Four Sashiko Patterns to Stitch and Sew

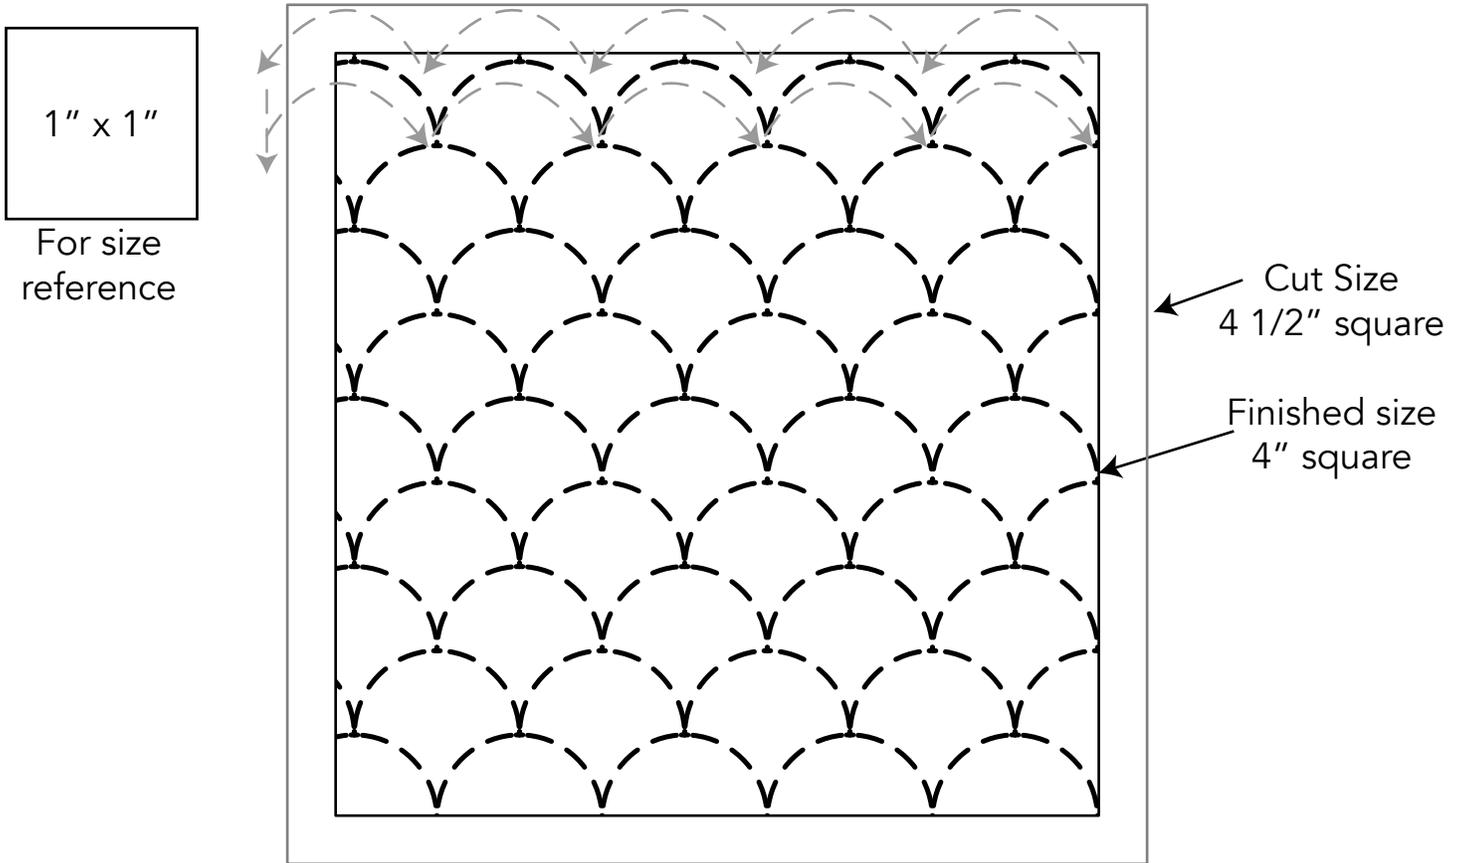

Sashiko

Coaster Pattern Set #2

1. Waves

A classic Sashiko stitch pattern inspired by the ocean. These are stitched in a continuous line, with no stranded threads on the back.

The dashed lines should be transferred to the front of your fabric as a solid line. The solid outer lines can be transferred, but should not be stitched. They are for reference only.

Makes one coaster that finishes at 4" square

 - Indicates stitching order/do not trace

Sashiko

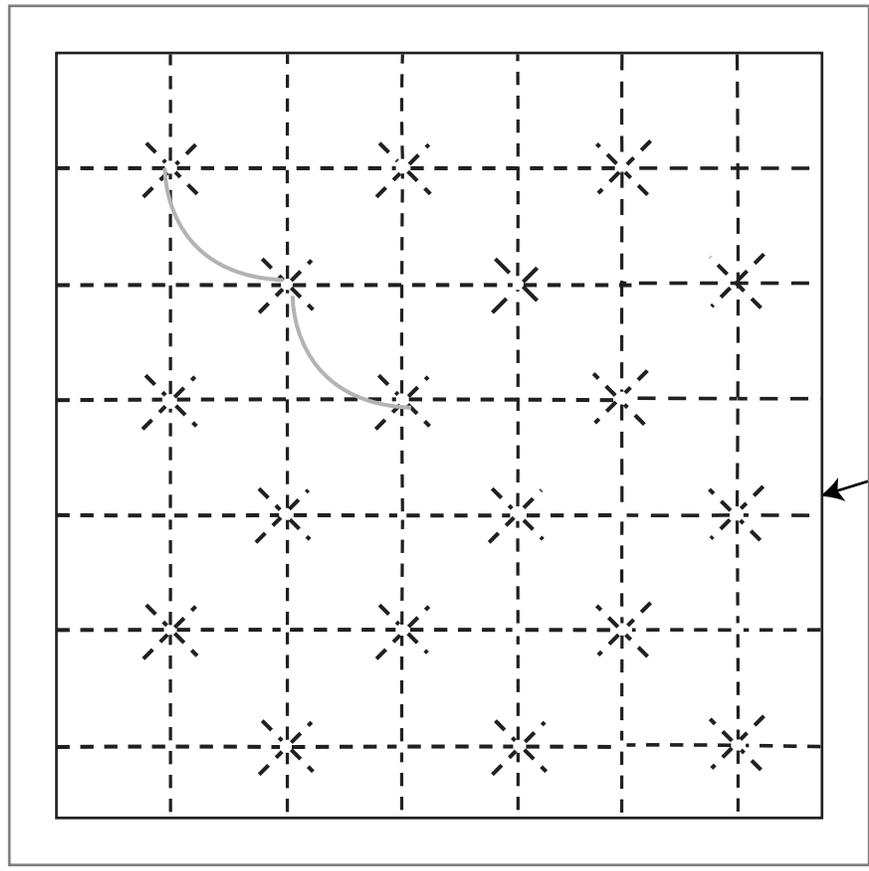

Coaster Pattern Set #2

2.Star Crossed

For size reference

Cut Size 4 1/2" square

Finished size 4" square

This stitch pattern is part of the group of "Moyozashi" stitch patterns. The most obvious characteristic of these patterns is that the stitches do not ever cross each other or touch.

Where the x's and grid pattern intersect, the threads should not touch or cross.

The dashed lines should be transferred to the front of your fabric as a solid line. The solid outer lines can be transferred, but should not be stitched.

They are for reference only.
Makes one coaster that finishes at 4" square.

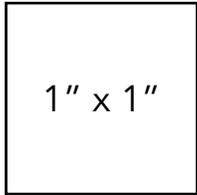

- Example of how you should carry the thread on the back across these areas (do not trace).

Coaster Pattern Set #2

3. Crossed

For size reference

Cut Size
4 1/2" square

Finished size
4" square

Also part of the group of "Moyozashi" stitch patterns, this one is all straight stitching its simplicity will allow you to play with adding a contrasting thread color.

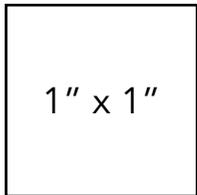

Again, where the x's and grid pattern intersect, the threads should not touch or cross.

The dashed lines should be transferred to the front of your fabric as a solid line. The solid outer lines can be transferred, but should not be stitched.

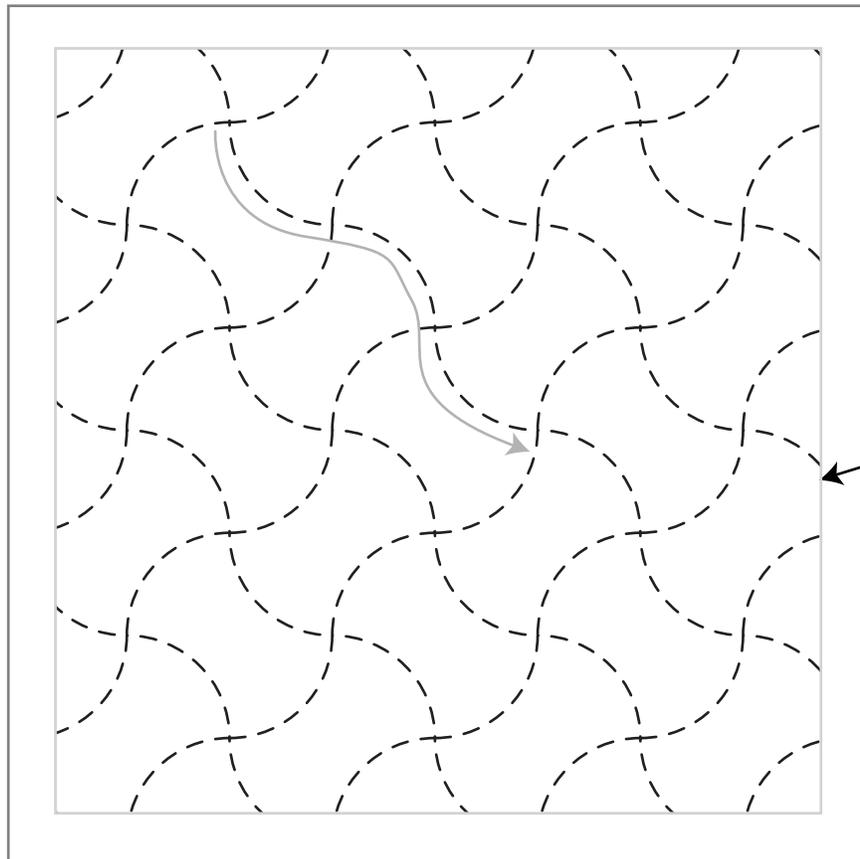

They are for reference only.

Makes one coaster that finishes at 4" square.

4. Fundo (Scale Weights)

1" x 1"
For size
reference

← Cut Size
4 1/2" square

← Finished size
4" square

Consists of wavy lines that are stitched on the diagonal, in the shape of traditional scale weights.

The dashed lines should be transferred to the front of your fabric as a solid line. The solid outer lines can be transferred, but should not be stitched.

They are for reference only.

Makes one coaster that finishes at 4" square.

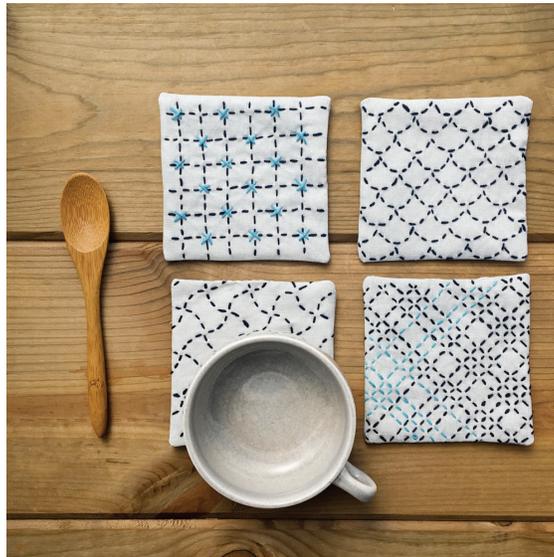

- Indicates stitching path reference, do not trace.

Finishing Your Coasters

wisecraft[™]
handmade by Blair Stoker

Once you have stitched each of the four patterns onto a 4 1/2" square piece of cloth, you are ready to sew these up into coasters. Here's how to do it:

Materials:

- Your completed Sashiko patterns, each stitched onto a 4 1/2" square piece of cloth. (Note: If you stitched all four patterns on one piece as I demonstrated, cut them into four 4 1/2" squares.)
- Four 4 1/2" square pieces of backing fabric
- Four 4 1/2" squares of light to mid weight fusible interfacing
- Sewing Machine with coordinating thread
- Iron and ironing surface
- Point Turner, like a chopstick, closed pair of scissors, bone folder, etc
- Scissors

To Make:

1. Fuse a square of interfacing to the wrong side of all four squares of backing fabric.
2. Layer one Sashiko square to one of the backing squares, right sides together. Using a 1/4" seam allowance and coordinating thread, stitch all the way around the perimeter, leaving 2" unsewn along the center of one side, for turning.
3. Trim the points of each of the four corners to ease bulk when turning. Gently turn the entire coaster right side out through the unsewn opening. Use a point turner to gently ease out the point of each corner as much as possible.
4. Press the coaster with an iron, turn in the open edge and press in place. Using matching thread, close the opening with small slip stitches.
